## EDUCATION

### UADE Business Schools, Buenos Aires — *Systems Engineer*

APRIL 2015 - PRESENT

Currently studying for the Systems Engineer degree.

## MY PROJECTS

### Nurit POS 3G — *Enabling modern internet speed on old devices*

I developed code to enable GPRS on old models of these POS (point of sale devices, mainly used in conjunction with credit cards). Allowing them to go from old and slow Cable Line connection to a decent 3G internet connection. This enabled speeds up to 10 times faster than cable line.

## Programming Languages:

C - C# - Python - JavaScript - Visual Basic 6 - x86ASM - T-SQL - PHP  
HTML5 - CSS3.

## Framework Skills:

MaterialSkin - Angular.js 2.0 - React.js  
Node.js - jQuery - AJAX - Bootstrap  
Nurit Framework - .Net Framework(3.5 to 4.7) - Net Core (2.0) - ASP.Net  
Express.js - IONIC & IONIC Native  
emmitter.io - leaflet.js - Node Package Manager - socket.io

## Familiar IDEs

Visual Studio - IntelliJ IDEA - Eclipse  
Android Studio - NetBeans - PyCharm  
Atom IDE - Vim

## DATABASE SKILLS

Microsoft SQL Server (2008 to 2012) -  
SQL Server Compact Edition - MYSQL  
- MongoDB - MariaDB

## OTHER SKILLS

Scrum Methodology - Arduino  
Programming - Database  
Maintenance - IT Support - Database

## **Open ERP — *An open source small/medium business ERP, for Windows, Mac and Linux***

I created an open source small / medium business ERP software (Enterprise resource planning) compatible with Windows, Linux and MacOS under the .Net Framework runtime library. Free of charge for everyone who wishes to set up a business. It also has Fiscal Printer capabilities and reporting systems as well, it's available on my github page.

<https://github.com/julianPescobar/Open-ERP>

## **#POTENCIATE Argentina : *Semifinalist – Social Security App***

My proposal for this government backed contest was to create an app to let civilians easily track their family, with crime and insecurity being really high in Argentina I created an app to let a user know (with that users consent) if that person arrived safely at some place or point (using GPS and google maps) they can call the police with gestures or just shake device if they feel they are in danger. They can also report their phone as stolen if they needed to do just that. There's also options for tourists (they can call their embassy for help if they needed to). It didn't make it to the first 3 places so it was discontinued.

Architect – Sysadmin Windows/Linux

UI & UX Development – Web

Animations – Translator –

Transcription – Adaptive to changes
